	Emerging	Developing	Secure	Mastery
Periodic Table	<ol style="list-style-type: none"> <li>1. <b>State</b> properties of metals and non metals</li> <li>2. <b>Describe</b> the reaction of a Group 1 metal and water</li> </ol>	<ol style="list-style-type: none"> <li>1. <b>Identify</b> the groups and periods of the Periodic Table</li> <li>2. <b>State</b> the properties and reactivity of the Group 1, 7 and 0 elements</li> </ol>	<ol style="list-style-type: none"> <li>1. <b>Use</b> data to describe a trend in physical properties</li> <li>2. <b>Use</b> data and observations to describe trends and predict properties of Group 1, 7 and 0 elements</li> </ol>	<ol style="list-style-type: none"> <li>1. <b>Use</b> patterns in data for physical properties to estimate a missing value for an element</li> <li>2. <b>Describe</b> the reactions of any Group 1, 7 or 0 element</li> </ol>
Health and Lifestyle	<ol style="list-style-type: none"> <li>1. <b>State</b> what is meant by a balanced diet, from a diagram</li> <li>2. <b>Recall</b> the nutrients found in food</li> <li>3. <b>Define</b> malnourishment and digestion</li> <li>4. <b>Recall</b> any effect of consuming alcohol or drug</li> </ol>	<ol style="list-style-type: none"> <li>1. <b>State</b> what is meant by a balanced diet and <b>recall</b> the nutrients needed</li> <li>2. <b>Describe</b> how to test food for starch, lipids, sugar and protein, with support</li> <li>3. <b>Describe</b> the role of enzymes in digestion</li> <li>4. <b>State</b> what is meant by a drug</li> </ol>	<ol style="list-style-type: none"> <li>1. <b>Describe</b> the components of a healthy diet</li> <li>2. <b>Describe</b> how to test food for starch, lipids, sugar and protein</li> <li>3. <b>Describe</b> some health issues caused by an unbalanced diet</li> <li>4. <b>Describe</b> the difference between recreational and medicinal drugs</li> <li>5. <b>Describe</b> the effect of alcohol on health and behaviour</li> </ol>	<ol style="list-style-type: none"> <li>1. <b>Explain</b> the role of each food group in the body</li> <li>2. <b>Describe</b> the positive result for each food test</li> <li>3. <b>Describe</b> the effects of drugs on health and behaviour</li> <li>4. <b>Describe</b> the effect alcohol has on conception and pregnancy</li> <li>5. <b>Explain</b> how smoking can cause disease</li> </ol>
Electricity & Magnetism	<ol style="list-style-type: none"> <li>1. <b>Use</b> repel and attract to describe magnet action</li> <li>2. <b>Recognise</b> common circuit symbols</li> <li>3. <b>List</b> similarities and difference between series and parallel circuits</li> <li>4. <b>Recall</b> a use of a electromagnet</li> </ol>	<ol style="list-style-type: none"> <li>1. <b>Describe</b> what is meant by current</li> <li>2. <b>Draw</b> series and parallel circuits</li> <li>3. <b>Describe</b> how magnets interact</li> <li>4. <b>Describe</b> how to make an electromagnet</li> </ol>	<ol style="list-style-type: none"> <li>1. <b>Describe</b> how to measure current</li> <li>2. <b>Draw</b> circuit diagrams and make circuits that measure potential difference</li> <li>3. <b>Describe</b> how current and potential difference vary in series and parallel circuits</li> <li>4. <b>Use</b> a diagram to explain how to make an electromagnet and change its strength</li> </ol>	<ol style="list-style-type: none"> <li>1. <b>Explain</b> how potential difference affects the way components work</li> <li>2. <b>Create</b> series and parallel circuits from circuit diagrams</li> <li>3. <b>Explain</b> what magnetic field diagrams show about directions and strength of the field</li> <li>4. <b>Explain</b> how electric bells, circuit breakers and loudspeakers work</li> </ol>
Separation Techniques	<ol style="list-style-type: none"> <li>1. <b>Define</b> mixture</li> <li>2. <b>Describe</b> solutions using key words, with support</li> <li>3. <b>Label</b> the apparatus involved evaporation &amp; distillation</li> <li>4. <b>State</b> what happens to mixtures when they undergo chromatography</li> </ol>	<ol style="list-style-type: none"> <li>1. <b>State</b> the properties of a pure substance</li> <li>2. <b>Describe</b> solutions using key words</li> <li>3. <b>State</b> the apparatus involved evaporation and distillation</li> <li>4. <b>Describe</b> the method of chromatography</li> </ol>	<ol style="list-style-type: none"> <li>1. <b>Explain</b> how substances dissolve using the particle model</li> <li>2. <b>Describe</b> how filtration works</li> <li>3. <b>Describe</b> how distillation works</li> <li>4. <b>Explain</b> how chromatography separates mixtures</li> </ol>	<ol style="list-style-type: none"> <li>1. <b>Explain</b> how to use melting temperature to identify pure substance</li> <li>2. <b>Explain</b> the use of filtration in separating mixtures</li> <li>3. <b>Explain</b> how distillation separates two substances with different properties</li> <li>4. <b>Analyse</b> chromatograms to identify substances in mixtures</li> </ol>
Energy	<ol style="list-style-type: none"> <li>1. <b>Define</b> fossil fuels and give examples</li> <li>2. <b>List</b> different types of energy</li> <li>3. <b>Recall</b> boiling and melting points of water and ice respectively</li> <li>4. <b>Define</b> thermal conductor and insulator with support</li> </ol>	<ol style="list-style-type: none"> <li>1. <b>State</b> the difference between a renewable and non-renewable energy resource</li> <li>2. <b>State</b> the different between energy and temperature</li> <li>3. <b>Define</b> thermal conductor and insulator, and give examples</li> <li>4. <b>State</b> some sources of infrared radiation</li> </ol>	<ol style="list-style-type: none"> <li>1. <b>Describe</b> how electricity is generated in a power station</li> <li>2. <b>Describe</b> what happens when you heat up solids, liquids and gases</li> <li>3. <b>Describe</b> how energy is transferred by particles in conduction and convection</li> <li>4. <b>Describe</b> how energy is transferred by radiation</li> </ol>	<ol style="list-style-type: none"> <li>1. <b>Evaluate</b> the use of different energy resource</li> <li>2. <b>Explain</b> what is meant by equilibrium</li> <li>3. <b>Explain</b> in detail the processes involved during heat transfers</li> <li>4. <b>Compare</b> insulation methods in terms of conduction, convection and radiation</li> </ol>
Ecosystem Processes	<ol style="list-style-type: none"> <li>1. <b>Define</b> aerobic and anaerobic</li> <li>2. <b>State</b> where in a plant, photosynthesis takes place</li> <li>3. <b>State</b> the different parts of a leaf, with support</li> <li>4. <b>Recall</b> simple food chains</li> <li>5. <b>State</b> some resources that plants and animals compete for, from diagrams</li> </ol>	<ol style="list-style-type: none"> <li>1. <b>State</b> the equation for aerobic &amp; anaerobic respiration</li> <li>2. <b>Recall</b> the word equation for photosynthesis</li> <li>3. <b>Identify</b> the different parts of a leaf</li> <li>4. <b>Describe</b> what food chains and food webs are</li> <li>5. <b>State</b> some resources that plants and animals compete for</li> </ol>	<ol style="list-style-type: none"> <li>1. <b>Distinguish</b> between aerobic &amp; anaerobic respiration</li> <li>2. <b>Describe</b> the process of photosynthesis</li> <li>3. <b>Describe</b> the function of the main components of a leaf</li> <li>4. <b>Describe</b> what food chains and webs show</li> <li>5. <b>Explain</b> how toxic materials can accumulate in a food web</li> </ol>	<ol style="list-style-type: none"> <li>1. <b>Relate</b> fermentation to how bread, beer and wine are made</li> <li>2. <b>Explain</b> how a leaf is adapted for photosynthesis</li> <li>3. <b>Combine</b> food chains to form a food web</li> <li>4. <b>Explain</b> the importance of insect pollinators</li> <li>5. <b>Explain</b> the interaction between predator and prey populations</li> </ol>
Metals and Materials	<ol style="list-style-type: none"> <li>1. <b>Recall</b> observations of burning magnesium</li> <li>2. <b>Identify</b> ceramics from diagrams</li> <li>3. <b>State</b> what a polymer is, with support</li> </ol>	<ol style="list-style-type: none"> <li>1. <b>State</b> what is formed with metals react with acids</li> <li>2. <b>Name</b> the substances formed when metals react with oxygen</li> <li>3. <b>State</b> what is meant by an ore</li> <li>4. <b>State</b> some uses of ceramics</li> <li>5. <b>State</b> what a polymer is</li> </ol>	<ol style="list-style-type: none"> <li>1. <b>Compare</b> the reactions of different metals with dilute acids or oxygen</li> <li>2. <b>Describe</b> reactions of metals &amp; water</li> <li>3. <b>Describe</b> the properties of ceramics and polymers</li> <li>4. <b>Describe</b> the properties of composites</li> </ol>	<ol style="list-style-type: none"> <li>1. <b>Describe</b> a metal acid reaction with a word equation</li> <li>2. <b>Compare</b> the reactions of different metals with water, oxygen and acid</li> <li>3. <b>Explain</b> why the properties of ceramics, polymers and composites make them suitable for their uses</li> </ol>
Adaptations	<ol style="list-style-type: none"> <li>1. <b>Define</b> compete</li> <li>2. <b>Suggest</b> reasons for camouflage adaptations</li> <li>3. <b>Define</b> characteristic, giving examples</li> <li>4. <b>Define</b> inherit</li> <li>5. <b>Define</b> "survival of the fittest"</li> <li>6. <b>Name</b> some extinct organisms</li> </ol>	<ol style="list-style-type: none"> <li>1. <b>State</b> what is meant by interdependence</li> <li>2. <b>State</b> what is meant by variation</li> <li>3. <b>Describe</b> how characteristics are inherited</li> <li>4. <b>State</b> what is meant by evolution</li> <li>5. <b>State</b> some factors that may lead to extinction</li> </ol>	<ol style="list-style-type: none"> <li>1. <b>Describe</b> how organisms are adapted to survive in their environments</li> <li>2. <b>Describe</b> the difference between environmental and inherited variation</li> <li>3. <b>Describe</b> the relationship between DNA, genes and chromosomes</li> <li>4. <b>Describe</b> the theory of natural selection</li> </ol>	<ol style="list-style-type: none"> <li>1. <b>Explain</b> the interaction between predator and prey populations</li> <li>2. <b>Explain</b> how competition can lead to adaptation</li> <li>3. <b>Explain</b> how a DNA mutation may affect an organism and its future offspring</li> <li>4. <b>Explain</b> why species evolve over time</li> <li>5. <b>Explain</b> why a species has becomes extinct</li> </ol>

Adaptation

STEM Challenge
